

BY THE "MASS-TIME TRIANGLE" = MTT

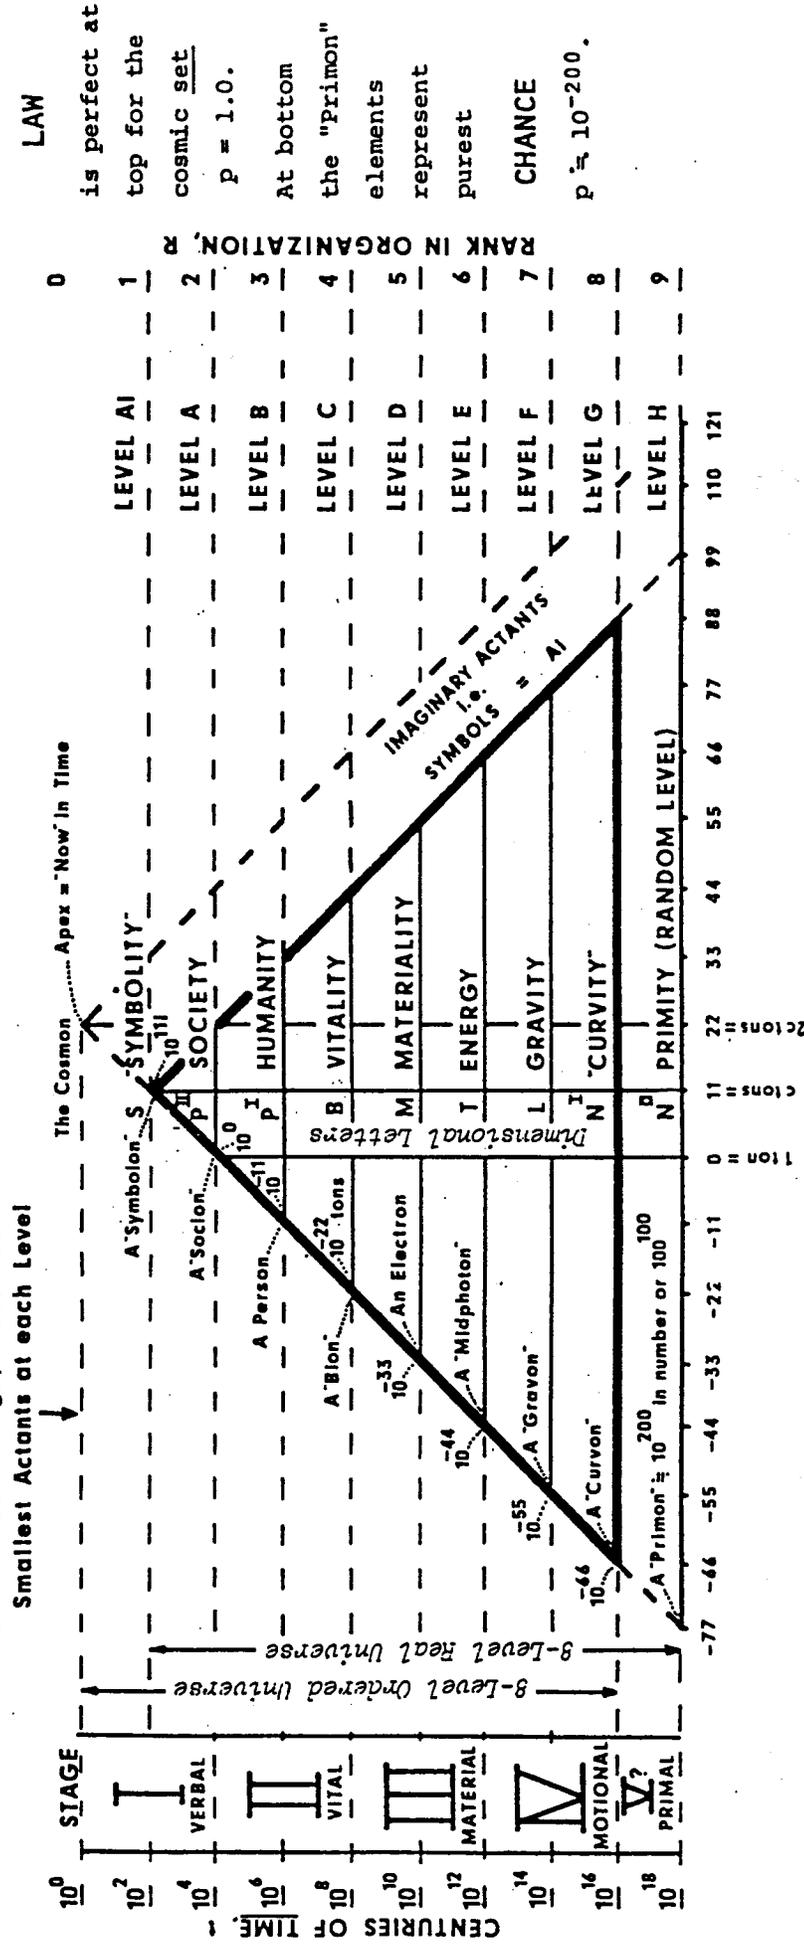

Plotting Cosmic Activity (in Actants, A)  
 vs. its Level of Organization (in bits =  $\lg A = O_r$ )  
 or Cohort Stage in Time (in cycles =  $(2\pi r)t = \Sigma |O_r|$ )

PAN-ACTS PICTURED

DEFINE COSMOS, (OR GOD<sub>c</sub>), AS THE UNIVERSAL SET (=  $U^0 = 1$ )

OF ALL NAMABLE ELEMENTS, CALLED "ACTANTS," A.

THE EPICISM HYPOTHESIS STATES FOR TESTING: IF ALL 'n ACTANTS (= THINGS-NAMABLE) INTERACT, RANDOMLY, CEASELESSLY AND REITERANTLY, FORMING AND EQUALLY UNFORMING IN THEIR OVERLAPPED COHORT LIFE-CYCLES, ALL THEIR 'n POSSIBLE COMBINATIONS, PERMUTATIONS AND REPETITIONS, THEN THEY ORGANIZE COSMOS AND ALL ACTANTS THEREIN AS HIERARCHIC NORMAL DISTRIBUTIONS, AT NINE LEVELS, BUILT BY VAST STOCHASTIC PROCESSES, AT AN OVERALL CONSTANT CREANT RATE, c (=  $19 \cdot 10 \approx 11$ ), DURING EACH COHORT'S LIFE-CYCLE OF  $10^{32}$  OR  $e^{37}$  YEARS.

LOG<sub>10</sub> TONS OF MASS (Extended at LEVELS F, G, H, and A1 to LOGS OF ACTANTS. A)

THE EPICISM EQUATION GRAPHED =  $U^0 = a/ct = 1$ . THIS SAYS: ACTANTS AT t = CREATION RATE X TIME TAKEN.
